

Exciting opportunities for Prosthetists to join our established clinical teams in Leeds and Nottingham!

Leeds

Our partnership with Leeds Teaching Hospital Trust (LTHT) has created an environment that is unique and forward thinking and we are proud to be at the cutting edge of UK provision in this area. The centre has been recognised with a number of National Awards and is the only centre to have won the limbless award for the DSC of Achievement award more than once.

We offer the successful applicant a position that:

- Is in a central UK location where relocation costs are relatively low
- Gives you, as clinician, a key role in the local MDT.

This is because this role offers the successful applicant an environment where:

- You have full autonomy over appointment booking.
- You are given budget responsibility and prescription rights

As part of your role you will be expected to work autonomously to clinically assess and treat a variety of different conditions, using the full extent of your clinical knowledge and current evidence-based practices.

Nottingham

Nottingham is a thriving city with a vibrant cultural scene, historical heritage and access to the nearby Sherwood forest and peak district, making it a great place to live and work. There are good motorway and rail links around the country and further afield via East Midlands airport.

The Nottingham Mobility Centre offers the opportunity to work with an extensive MDT that includes a clinical psychologist and close links with paediatric, orthopaedic and plastic surgeons. Nottingham has always been at the forefront of upper limb provision in the UK so interest in this area of prosthetics would be an added advantage.

We offer the successful applicant a position with:

- A supportive, inclusive environment with access to NHS AHP training and development opportunities and dedicated CPD time
- A key role in the local MDT in developing care pathways, with prosthetic prescription responsibility
- The opportunity to develop and help shape the future of the service alongside our NHS partners
- An onsite prosthetic workshop with a team of experienced technicians
- CAD scanner and software

As part of your role, you will be expected to clinically assess and treat a variety of different conditions, using the full extent of your clinical knowledge and current evidence-based practice. Whilst clinical experience is preferred, graduates are also invited to apply and would benefit from the Steeper Preceptorship program.

If you care passionately about the service you deliver, act with integrity in ethical decision making and care about making a difference to patient's lives, then Steeper would be a great career opportunity as your next clinical role. Any successful candidate will receive a competitive salary based upon experience and will qualify for our employment benefits scheme. We may also ask you to be involved in wider company initiatives such as our Best Practice, Clinical Services and Innovation forum groups, or assisting in new product development, meaning your career with Steeper could be broader and more dynamic than your clinical role alone.

If you would like to work with the largest group of Prosthetists and Orthotists in the country, then please apply by sending your CV to

hr@steepergroup.com. For further information on these exciting positions please visit our website <https://www.steepergroup.com/about-steep/careers/current-opportunities/>

Applicants must be HCPC registered and preferably members of BAPO.
Closing date: 16th March 2023
