

Central Regional Manager - Peke Waihanga- Wellington, New Zealand

Peke Waihanga is one of New Zealand's leading health service providers. Our vision is 'independent lives for the people we care for'. We are a Crown entity that provides prosthetics and orthotics with integrated rehabilitation and coordination of care services to patients across New Zealand.

We are seeking a Regional Manager for our Central Region. The role is based in our Wellington Centre in Newtown and incorporates the Whanganui, Hawke's Bay, MidCentral, Wairarapa, Capital & Coast and Hutt Valley and Nelson areas.

As Regional Manager you will be responsible for creating a world class, patient centred service in the Central region, through excellence in team and stakeholder leadership and business management. This is a key role in organisation, and we are seeking a highly motivated, positive and empathetic leader who has an interest in prosthetics, orthotics and rehabilitation.

A clinical health background would be advantageous for this role - though not a must, and we are interested in applications from candidates with a strong health service orientation and excellent relationship building skills.

The Central Regional Manager will report directly to the CEO and support Peke Waihanga's strategic objectives by growing and developing their expert workforce, embracing technology/research & development and ensuring equity in service delivery.

More specifically, the Central Regional Manager will:

- build effective and long-lasting relationships to provide a better continuum of care for our patients.
- provide a co-ordinated, 'whole of life' service linking surgeons, technicians, prosthetists, orthotists, physiotherapists, nurses, rehabilitation specialists, peer support volunteers and collaborating with other health service providers.
- optimise Peke Waihanga's service delivery by running an effective regional clinic programme that maximises patient participation and makes it easy for Maori and Pacific Islander patients to access our services.
- provide strong, positive leadership, ensuring the Central Region is staffed with a high performing team and staffing levels and skills sets meet the demands of business needs.
- maintain a clinical caseload (if appropriate)
- comply with the Health and Safety at Work Act 2015 (HSWA).

The ideal candidate will have the following skill set, (linked to the themes of our strategic plan):

- **Service** - to provide a 'whole of life' service and have the desire and motivation to personally contribute to our strategy and be part of a future thinking and innovative team.
- **Expert Workforce** - have proven leadership skills, a strong health service orientation and the ability to foster and cultivate business opportunities and partnerships.
- **R&D/Technology** - have a passion for embracing technology and research to improve the patient experience and a strong desire to continually improve processes and standards to gain operational efficiencies. You will have a strong Microsoft Office background, an understanding of patient management software and databases and be computer savvy.
- **Equity** - strive to understand the needs of patients and provide practical solutions that create equitable outcomes. Maximise opportunities in our ACC and health contracts to get the best outcomes for patients in your region.

As an employer, Peke Waihanga values our staff and is committed to promoting and protecting their health and well-being. We provide a supportive work environment with employee benefits including flexible working hours, 23 days annual leave per year, free health checks and flu vaccinations, health insurance discounts, up to 4% employer KiwiSaver contribution and professional development opportunities.
