

Orthotist - London Orthotics Salford, Manchester

Role: Orthotist

Location: Salford, Manchester (with travel to the London clinic)

Salary: Competitive based on experience + discretionary bonus

Benefits: 25 days annual leave + bank holidays, BAPO membership paid

Qualifications/Experience: HCPC registered, 5 years' post qualification experience and preferably a member of BAPO

Closing date: Friday 28 April 2023

The London Orthotic Consultancy www.londonorthotics.co.uk is a private clinic that provides bespoke orthotic treatments for a wide range of adult and paediatric medical conditions. As LOC is a truly independent clinic, we are able to prescribe the orthotics we believe are most suitable for our patients, rather than being restricted to a limited, specified corporate range. We are passionate about innovative and evidence-based orthotic solutions and their capabilities to improve lives. We primarily see private clients across the UK and LOC has achieved both national and international acknowledgement for expertise in specialities such as pectus, scoliosis, plagiocephaly and lower limb biomechanics using our onsite gait laboratories.

This is a fantastic opportunity for an experienced Orthotist looking for their next progressive career step as this role will be autonomously running our Manchester clinic. Whilst this role is working solely in Manchester you will be supported by colleagues in our London and Cambridge clinics. Please note the role will require regular travel to London during the first few months of your induction period, followed by occasional travel for peer support and training.

Our ideal candidate will have a minimum of 5 years' experience post qualification. The role will be based at LOC Salford where there are high quality facilities including a sophisticated gait lab. Initially, the candidate will be required to work a percentage of their week at LOC's Head Office in Kingston Upon Thames to learn LOC's treatment methods, from our current team who are dedicated and passionate about delivering and developing a first-class, evidence-based service. We see this weekly time at Kingston as a relative short-term plan and once up to speed, the candidate will be running LOC's Salford clinic. The role would suit an individual who is extremely proactive with the ability to work within a demanding clinical environment and who wishes to deliver first class care for their clients.

Key benefits of working for LOC include:

- Competitive salary (including an annual appraisal scheme and discretionary annual bonus)
- 25 days annual leave + bank holidays
- On site manufacturing workshop
- International patient reach
- Referral system with top consultants
- Innovative and forward-thinking R&D with onsite 3D printed products
- Patented LOC specific products (LocBand & LOC Scoliosis Brace)
- Dedicated and supportive administrative and technical support
- Development opportunities which include national and international training and conference attendance
- Opportunity to be involved in leading R&D projects
- BAPO membership paid and HCPC fees paid
- Christmas and Summer business-wide socials
- After 1 years' service the opportunity to join the subsidised Company Private Health Insurance

By joining LOC, you will gain exposure to our bespoke scanning systems and onsite 3D printed products, which shall provide an insight into our vision for future orthotic practice. If you would like to join a motivated and forward-looking organisation that is committed to your development, then we would welcome your application. You must be HCPC registered and preferably a member of BAPO. This role will be subject to an enhanced DBS check prior to employment.

To apply, please email your CV with a cover letter to:
