

Job Advert

Senior Orthotist, Yorkshire

We currently have exciting an opportunity for a Senior Orthotist to join our established clinical teams in Yorkshire!

An exciting opportunity has arisen for Full or Part Time Senior Orthotist to join our established clinical team working in partnership with the Yorkshire NHS contracts we provide. The Yorkshire role provides an ideal opportunity for the successful candidate to further enhance their clinical skills and knowledge in Orthotics by working in specialist MDT clinics and help develop services and junior members of staff by contributing to our preceptorship programme.

You will join a regional network of 11 Orthotists where you will provide a senior role working with junior members of the team and sharing knowledge across our network. You will be well supported and provided with a range of development opportunities meaning your sole focus will not be limited to clinical activity but also engaging with the wider business. Strong team working, confidence and the enthusiasm to further your clinical career are key attributes for this role.

The Service in Yorkshire is based around 3 main Trusts: Hull University Teaching Hospitals Trust, Mid Yorkshire Hospitals Trust, and Barnsley Hospitals. This role involves working predominantly within the Hull University Teaching Hospitals Trust, where we have dedicated outpatient clinics specialising in areas such as Paediatrics, Rehabilitation, Orthopaedics and Diabetes. You will have the opportunity to work in a well-established MDT setting where we have developed strong relationships with a wide range of AHP colleagues. The variety of clinics offer excellent opportunities to seek specialism within a particular field of particular interest to you. As well as the more specialist MDT clinics, the caseload will also provide enjoyable challenges working with neuromuscular, rheumatology and MSK patients, where whole gait analysis and biomechanical solutions will be required. CPD time will be provided for self-development and development of the service, to ensure we maximise clinical and patient outcomes.

As part of your role, you will be expected to work autonomously to clinically assess and treat a variety of different conditions, using the full extent of your clinical knowledge and current evidence-based practices. Good communication skills are essential for the patient experience, but also to develop strong relationships with key referrers within the multi-disciplinary team. Steeper will commit to developing your skills further through varied

training opportunities both online and in person. We may also ask you to be involved in wider company initiatives such as our Best Practice, Product Evaluation and Innovation Forum Groups, or assisting in new product development, meaning your career with Steeper could be broader and more dynamic than your clinical role alone.

Situated on the doorstep of the Yorkshire Wolds and within a short drive of the picturesque east coast, this position in Yorkshire is ideal for anyone looking to relocate, plus with good transport links is an easy commute from nearby York or Leeds. Following winning City of Culture 2017 Hull city centre saw a 1-billion-pound regeneration creating a beautiful shopping and restaurant area situated next to the Marina.

For informal discussions or for more information please call Will Butterill on 07512222884 or by email William.butterill@steepergroup.com

If you would like to work with the largest group of Prosthetists and Orthotists in the country, then please apply by sending your CV to hr@steepergroup.com. For further information on these exciting positions please visit our website <https://www.steepergroup.com/about-steeper/careers/>

Applicants must be HCPC registered and preferably members of BAPO.

Closing date – 24th May 2024
