

Clinical Product Developer (Manufacturing and Product) Hybrid with minimum 1-2 days per week on site in Leeds

We have an exciting opportunity for a Clinical Product Developer to join our team in Leeds.

As a Clinical Product Developer, you will play a crucial role in bridging clinical expertise and innovation. You will be involved at all stages of the development of new prosthetic and orthotic (P&O) products, from the ideation stage through to commercialisation. This role requires strong knowledge of P&O devices, alongside a passion for technology, innovation and patient care.

Key Responsibilities:

Design

- Apply a strong clinical background and understanding of custom-made P&O manufacturing processes.
- Apply clinical expertise to inform design decisions for biomechanical soundness, comfort, safety, and useability.
- Translate patient needs into user inputs and design outputs.
- Create structured feedback documentation to evaluate the success of designs.
- Work with cross-functional teams to determine appropriate usability and functionality testing of new products.
- Stay informed about the latest advancements in 3D printing technology, materials and manufacturing processes, and provide clinical perspective how these could improve clinical practice through innovation.
- Maintain regular two-way communication between clinical teams, product development, and manufacturing to capture insights and close feedback loops.
- Collate, interpret and present performance data gathered during the design and development process.

Regulatory

- Maintain and manage detailed records of clinical investigations.
- Contribute to accurate design documentation, regulatory records, and technical files from a clinical standpoint, ensuring traceability from user need to design output.
- Create clinical guidelines for new devices during the development phase and review and formalise these to create official Instructions for Use (IFU) documentation for product launch

Project management and communication

- Liaise with clinical teams in the creation and rollout of clinical investigations and related activities.
- Work closely with engineering, regulatory and manufacturing teams to deliver safe, effective and innovative devices.
- · Manage multiple projects simultaneously.

 Communicate with the appropriate teams on ordering requirements for new products.

Skills and Experience:

- Knowledge and proven application of biomechanics in Prosthetics and Orthotics.
- Excellent communication skills and ability to work in cross-functional teams.
- Strong problem-solving skills and attention to detail.
- Self-driven and motivated individual with a passion to innovate.
- Organisational skills such as time and resource planning.
- Positive and proactive 'can-do' attitude.
- Comfortable working in a fast paced and flexible organisation.
- Enjoys creative work and being involved in highly impactful projects.
- · Confidential and professional.

Qualifications:

Essential:

Clinical qualification in Prosthetics and Orthotics.

Desirable:

- Familiarity with ISO 13485.
- · Applicants are preferably members of BAPO

What we Offer:

- Competitive market salary
- Incremental holiday allowance stating at 33 days, increasing to 38 days with length of service (inclusive of bank holidays)
- Refer a Friend incentive scheme
- Enhanced Family Leave/Pay
- Recognition schemes
- Continuing professional development

Why Join Us?

At AM Healthcare Group, we are dedicated to enhancing the lives of individuals who rely on mobility and accessibility solutions. As an international group of companies, we provide innovative products and services that make a real difference in people's daily lives.

We are proud to be an equal opportunities employer with a firm commitment to diversity and inclusion across all areas of our organisation. As a Disability Confident Employer, we actively welcome applications from individuals of all abilities. If you require any support or adjustments during the recruitment process, please do not hesitate to get in touch.

We are also a proud signatory of the Armed Forces Covenant, and we encourage applications from veterans, reservists, and members of the wider armed forces community.

How to Apply:

If this sounds like the perfect role for you, we'd love to hear from you! Please

submit your CV and a cover letter detailing your suitability for the position to recruitment@am-healthcare.com. Alternatively, you can apply directly through our website - www.amhealthcaregroup.com/careers.

Eligibility to Work in the UK:

Please note that applicants must have the right to work in the UK at the time of application. Unfortunately, we are unable to provide visa sponsorship for this role.

Closing Date: 31st January 2026
