

# WEBINAR

The Role of Spring Loaded  
Bracing in Patellofemoral OA  
& Quadriceps Weakness

**DATE:**

Wednesday 13<sup>th</sup> May, 2026  
12 pm - 1 pm (UK)

**JOIN US**

<https://bit.ly/4tC5qCK>

Hosted in collaboration with the British Association of  
Prosthetists and Orthotists (BAPO)

Patellofemoral osteoarthritis and quadriceps weakness continue to present significant challenges and remain difficult to manage. While conventional knee bracing often focuses on tibiofemoral offloading, support for the extensor mechanism during functional activity remains limited.

We're delighted to invite you to our upcoming webinar where we explore a different approach:

## The Role of Spring Loaded Bracing in Patellofemoral OA and Quadriceps Weakness

- Wednesday 13th May 2026
- 12:00 – 1:00 PM (UK)
- Online (Microsoft Teams)

[CLICK HERE TO REGISTER FOR THE WEBINAR](#)

**This session will bring together biomechanics, clinical reasoning, and real-world application to explore:**

- Biomechanical challenges associated with patellofemoral OA and quadriceps weakness
- Clinical rationale for extension assist in supporting the extensor mechanism
- Evidence from peer-reviewed biomechanical and clinical research
- Practical considerations for patient selection and fitting guidance

You'll also gain insight from published studies, clinical case material, and real-world data to support integration into routine practice.
