**Orthotics.co.uk**  
**Associate Senior Orthotist - Liverpool/Manchester**

A large red square containing the word "ORTHOTICS" in white, bold, uppercase letters. The letter "O" is stylized with a circular cutout.

**ORTHOTICS**

**Orthotics UK** is part of the Tx Group, a growing private therapy organisation providing a range of health and education therapy services across the North West of England. The Tx Group strives to provide the best possible experience for its clients through specialist clinicians delivering exemplary clinical care, dedicated support staff offering exceptional customer service, and a commitment to maintaining high-quality clinic facilities and resources.

Orthotics UK is a private orthotic clinical service providing immediate access to leading orthotic solutions, with clinics based in Manchester, Liverpool, and Leeds. We take pride in supplying bespoke orthotic solutions that help our patients maximise their function and performance whilst consistently exceeding expectations. We are an innovative organisation that places patients at the heart of everything we do.

We offer the latest technology and cutting-edge solutions and work collaboratively as an expert multidisciplinary team to provide the highest standards of care and achieve the best possible outcomes. Our multidisciplinary team currently includes orthotists, prosthetists, physiotherapists, podiatrists, and occupational therapists. We pride ourselves on being an accessible and reliable service and strongly believe in the provision of long-term aftercare and support.

We have an exciting opportunity for an Associate Senior Orthotist to join our team and support our growing client base. The role will predominantly be based at our Liverpool clinic location however, there may also be scope to develop a caseload at our Manchester location. There will also be occasions where appointments are carried out within the local community.

**The role will involve:**

- Undertaking orthotic assessments for clients.
- Recommending and prescribing appropriate orthotic solutions.
- Taking casts and measurements for bespoke orthoses.
- Fitting and reviewing orthotic devices.
- Completing onward referrals to other healthcare professionals where appropriate.

- Supporting service development through active promotion of the Orthotics UK brand.

In return, you will be supported in developing personal research interests and clinical specialisms, provided these contribute positively to the reputation and growth of the organisation.

We provide a friendly and supportive learning environment for our employees. Should you require the support or advice of a senior practitioner from any area of our multidisciplinary team, access to guidance and collaboration will be readily available. Tx Group also offers a variety of learning and development opportunities, including regular in-service training and discounted access to external courses.

Primarily, the successful candidate must be able to open their diary for appointments at least one day per week at our Liverpool clinic in Aintree. Ideally, the candidate would also have the flexibility to offer clinical days at our Manchester location in Salford on Wednesdays, Fridays, Saturdays, or Sundays. These days could be adjusted for the ideal candidate.

This position would suit a candidate with significant clinical experience who is comfortable allowing their caseload to build gradually over time. It may particularly appeal to someone looking to transition from full-time to part-time work, or to undertake additional work alongside existing employment.

Due to the potential requirement for home visits, applicants must hold a full driving licence and have access to a car.

#### **To be successful in this role, you would need to:**

- Be experienced in providing a wide range of custom-made and off-the-shelf orthotic devices, including AFOs, GRAFOs, DAFOs, and KAFOs.
- Be able to undertake detailed gait analysis and prescribe, fit, and review custom-made orthotic insoles.
- Have orthotic expert witness/medico-legal experience, have completed the Bond Solon training course, and/or have an interest in developing this area of practice in the future.
- Ideally have previous experience working within a private orthotic setting, although this is not essential.

#### **What does it take to be successful in this role?**

To be successful in this role you would need to:

- Have your clients at the heart of every decision you make.
- Be passionate about maximising the performance of your clients and exceeding their expectations.
- Continually provide consultations, fittings and reviews of an exceptional standard for your client base.
- Have an innovative approach to the situations you are presented with.
- Be flexible in your approach - confident in working both as an autonomous practitioner and in getting the best possible results through working alongside a multidisciplinary team.
- Possess great communication skills and the ability to build long lasting relationships with clients.
- Maintain and build on the client base for the service through providing positive experiences for clients.
- Show motivation and enthusiasm about continually developing and shaping an expanding service.
- Act as a champion for the service.

- Stay true to the organisation's values.

### **The Ideal Candidate**

The successful applicant must meet the following requirements:

- BSc (Hons) degree in Prosthetics & Orthotics.
- HCPC registered.
- Eligible to become, or currently a full member of BAPO.
- Eligible for, or currently holding, BAPO Professional Indemnity Insurance (PII) top-up cover.
- A minimum of five years' orthotic clinical experience.
- Would reside in the Liverpool / Manchester region.
- Would be able to start within four weeks of accepting the role.

### **Why us?**

At Tx Group, we believe that looking after our employees and providing an enjoyable working environment is an important factor in maintaining a successful organisation. If you are successful in this application process, you will be able to enjoy:

- Working in an innovative environment with devices that are not funded by the NHS.
- More independence and autonomy than other employers.
- The opportunity to collaborate with a multidisciplinary team.
- An opportunity to influence the direction of the service as it develops.
- Nurturing your own skills and interests.
- Competitive pay
