

Job Advert

The London Orthotic Consultancy - Orthotist The London Orthotic Consultancy (LOC)

Orthotist – The London Orthotic Consultancy (LOC) Part of OrthoPediatrics Speciality Bracing (OPSB)

Join the Future of Orthotic Care

The London Orthotic Consultancy (LOC) is proud to be part of OrthoPediatrics Speciality Bracing (OPSB), a global organisation dedicated to advancing orthotic care through clinical excellence, innovation, and specialist bracing solutions.

As the UK partner within the OPSB family, LOC combines world-class specialist clinical expertise with the resources, innovation, and international reach of one of the most respected organisations in paediatric orthopaedics. Together, we are creating something unique within the orthotic profession: a clinical environment where Orthotists are empowered to deliver gold-standard care using the latest technologies, evidence-based treatment pathways, and truly patient-centred solutions.

We believe exceptional Orthotists achieve exceptional outcomes when they are given the right support, the right tools, and the time to focus on what matters most – their patients. That philosophy sits at the heart of everything we do.

This is an exciting time to join LOC. Through our partnership with OPSB, we are investing heavily in our people, technology, research, and clinic network. We are building an organisation where Orthotists can become the very best version of themselves professionally whilst helping to shape the future of orthotic care.

Multiple Opportunities Across the UK

As part of our continued growth, we are recruiting for multiple Orthotist positions across the UK.

We welcome applications from:

- Newly qualified graduates
- Early-career Orthotists
- Experienced Orthotists
- Senior clinicians
- Specialist Orthotists seeking a new challenge

We are keen to hear from Orthotists based anywhere in the UK. Whilst we have established clinic locations, we continue to expand our network and are always interested in speaking with talented clinicians who share our values and ambitions.

What Matters Most

Whilst experience is valuable, it is not the most important quality we look for.

We are seeking Orthotists who are passionate about patient care, committed to clinical excellence, and have a genuine desire to learn and grow professionally. Whether you are newly qualified or highly experienced, we believe the best clinicians never stop learning.

If you bring enthusiasm, professionalism, curiosity, and a commitment to improving patient outcomes, we will provide the support, mentorship, technology, and opportunities to help you fulfil your potential.

Become the Best Orthotist You Can Be

At LOC, we are passionate about developing Orthotists throughout their careers.

Our clinicians work alongside some of the UK's most experienced specialists in paediatric orthotics, lower limb biomechanics, gait analysis, scoliosis management, pectus bracing, cranial remoulding, and emerging orthotic technologies.

You will benefit from:

- Direct mentorship from highly experienced senior clinicians
- Structured clinical development pathways
- Regular peer review and case discussion
- Access to specialist paediatric and adult patient populations
- Clinical freedom to prescribe the solution that is genuinely best for each patient
- Advanced technologies including gait analysis, 3D scanning, CAD design, digital workflows and 3D printing
- Opportunities to participate in research and clinical outcome studies
- National and international conference attendance
- Exposure to complex and highly rewarding patient cases
- Collaboration with leading consultants and multidisciplinary teams
- Opportunities to contribute to innovation and the development of future orthotic technologies

Our ambition is not simply to employ Orthotists. Our ambition is to develop the next generation of leaders, specialists, researchers, and innovators within the profession.

About LOC

The London Orthotic Consultancy is a leading network of specialist orthotic clinics providing bespoke orthotic treatment for both adult and paediatric patients across the UK.

We specialise in:

- Lower limb biomechanics and orthotic management
- Advanced gait analysis and gait laboratory assessment
- Scoliosis management and bracing
- Pectus bracing
- Cranial remoulding through the LocBand programme
- Emerging robotic orthotic technologies
- Digital orthotic design and manufacturing

LOC has received national and international recognition for its expertise in specialist areas including scoliosis, pectus management, plagiocephaly, and lower limb biomechanics.

We are passionate about advancing the profession through research, innovation, and clinical data collection, regularly presenting our work at national and international conferences.

Why Join LOC?

- Competitive salary package
- Annual appraisal and discretionary bonus
- 25 days annual leave plus bank holidays
- BAPO membership paid
- HCPC registration fees paid
- Private Health Insurance after one year of service
- Dedicated onsite manufacturing workshop at our Kingston upon Thames headquarters

• Access to specialist LOC product lines including the LocBand and LOC Scoliosis Brace

- Exposure to an international patient base
- Referral pathways with leading UK consultants
- Research and development opportunities
- Advanced scanning, CAD, digital manufacturing and 3D printing technologies
- National and international training opportunities
- Conference attendance and presentation opportunities
- Supportive administrative and technical teams
- Company social events

By joining LOC, you will gain exposure to advanced scanning systems, digital workflows, robotic orthotic technologies, and onsite manufacturing processes that are helping shape the future of orthotic practice.

Essential Requirements

- HCPC registered (or eligible for registration)
- Ideally a member of BAPO
- Enhanced DBS check required before employment
- Full right to work in the UK
