

The British Association of
Prosthetics and Orthotics

Job Advert
Somerset NHS Foundation Trust
B7 Specialist Orthotist (indicative banding)

Somerset
NHS Foundation Trust

We are looking for an enthusiastic, highly motivated and experienced Orthotist to join our growing Orthotics team in Somerset.

This is an exciting opportunity to take on a Band 7 Specialist Orthotist role, with a particular focus on leading the Orthotics diabetic service and associated pathways across Yeovil and the community. The post would suit an Orthotist with substantial experience in managing complex clinical presentations, especially for patients with diabetes.

You will be joining a supportive and developing service, working as part of several MDTs and contributing to a varied and interesting caseload across acute and community settings. The role spans all four pillars of practice, including leadership, education, line management responsibility and service development.

A key part of the role will be helping to develop competencies, training and learning opportunities across the team, including support for learners. We are looking for someone who is confident working with highly complex cases and who is keen to help shape and strengthen the service as it continues to grow.

Travel between sites is an essential part of the post, as you will work across the county at both acute and community sites, as well as providing ward cover. Flexible working and part-time applications are welcomed.

Interviews will include a short presentation.

Banding is currently indicative and will be confirmed as part of the recruitment process before any offer is made.

If you are interested in applying, we would be delighted to hear from you.
